PC/MAC

② ① microUSB

💡 Tips

1. A few laptops such as Thinkpad or Thinkbook, are able to power WPS TX directly from the HDMI port. To test if the laptop is able to offer power through HDMI port, customers can plug the WPS TX to the HDMI port directly without USB power supply after RX is correctly installed ,Wait for around 30s, if the laptop screen is successfully streamed to the TV display, then there is no need to offer extra power by USB. If not, unplug the HDMI and power WPS TX by USB power then plug the HDMI again.

2.For laptops without HDMI port such as MacBook Air or HUAWEI MateBook, we suggest using USB-C to HDMI converter.

3.If USB port for power supply on the laptop is close to HDMI port, we suggest using the HDMI male to female extender cable.

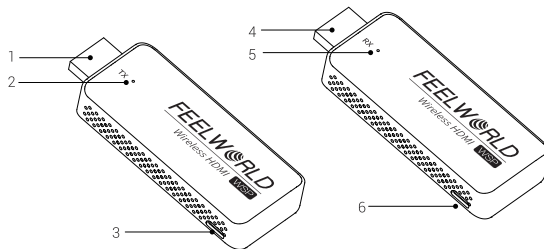

Specification

Transmitter	
Power	MicroUSB
	5V DC 500mA
	Max 2.5W
HDMI	HDMI 1.3
Supported Input Resolution	720x480@60 | 720x576@50 |
	1280x720@50/60|
