
4K UHD PTZ Camera

User Manual

Preface

This manual is to ensure that the user can use the product properly and avoid danger while operating. Before using this product, please read the user manual carefully and keep it properly for future reference

Overview

This manual is about PTZ camera operation

Graphic Symbols

Description of graphic symbols used in this manual

Symbols	Description
 Illustration	This symbol indicates that the words are clarification or supplement to this article.
 Caution	This symbol indicates that negligence of the instructions may lead to mishandling that may cause injury or property damage.
 Danger	This symbol indicates a risk that may result in damage to this machine or documents. Follow the instructions to avoid property damage.

Attention

This manual introduces functions, installations and operations for this product in details. Please read this manual carefully before installation and use.

Precautions:

This product can only be used in the specified conditions in order to avoid any damage to the camera:

- 1) Do not expose the product to rain or moisture.
- 2) To prevent the risk of electric shock, do not open the case. Installation and maintenance should only be carried out by qualified technicians.
- 3) Do not use the product beyond the specified temperature, humidity or power supply specifications.
- 4) Please use a soft dry cloth to clean the camera. If the camera is very dirty, clean it with diluted neutral detergent; do not use any type of solvents, which may damage the surface.

Electrical Safety:

Installation and use of this product must strictly comply with local electrical safety standards.

Transportation:

Avoid any stress, vibration, or moisture during transportation, storage, installation and operation

Installation:

- 1) Do not rotate the camera head violently, otherwise it may cause mechanical failure;
- 2) This product should be placed on a stable desktop or other horizontal surface. Do not install the product obliquely, otherwise it may display inclined image;
- 3) Ensure there are no obstacles within rotation range of the holder.
- 4) Do not power on before completely installation.

Do Not Dismantle Camera:

We are not responsible for any unauthorized modification or dismantling.

Magnetic Interference

Electromagnetic fields at specific frequencies may affect the video image. This product is Class A. It may cause radio interference in household application. Appropriate measure is required.

---------------------------	----

1. Quick Start

1.1 Interface

Figure1-1 Interface

Interface Introduction :

1, Lens	7, SDI Output	13, RS232 Output
2, Base	8, HDMI Output	14. RS422 Compatible with RS485
3, Receiving Light	9, USB 3.0	15, LAN Jack
4, Reserved Hole for Bottom Dial Switch	10, Audio In Jack(LINE-IN)	16, Power In Socket
5, Screw Hole for Tripod	11, Rotary Dip Switch	17. Power Switch
6, Hole for Installation Fixation	12, RS232 Input	

When using the camera, please put the plastic pad on the center bottom of device

1.2 Power-on Self-Test

1.2.1 Power on

Connect device to power socket with DC12V power adapter

1.2.2 Self-test

After power on, the receiver light will start flashing and camera will do a brief pan-tilt tour and return to the home position. When light stop flashing, the self-test is finished.

Caution

- Default address of the remote control is 1#. When menu restore default setting, the address of IP remote control will restore 1#.
 - If preset 0 is set, the camera will return to the preset 0 position after self-test
-

1.3 Video Output

This series camera can output video through network, HDMI, SDI, and USB3.0.

1.3.1 Network Output

- a, Network connection: Shown as diagram 1.1 #15
- b, Log in: You can reach the Web Interface by typing in the camera's IP address(default 192.168.5.163) into a web browser. To log in, type in "admin" into the username and password fields. From the Web Interface, you can adjust many of your camera's settings via this IP interface, like PTZ control, video recording, playback, and configuration setting.

1.3.2 HDMI Output

- a, HDMI connection: Shown as diagram 1.1 #8
- b, Connect camera to the display device via HDMI cable.

1.3.3 USB3.0 Output

USB3.0 Connection : Shown as diagram 1.1 #9

Connect camera to the display device via USB3.0 cable

1.3.4 SDI Output

SDI video cable connection: as shown in Figure 1-1 labeled 7.

Connect the device and the monitor correctly through the SDI video cable, and the device will be ready to output a picture when the self-test is completed.

1.4 Bracket

Caution

- Bracket can only be wall mounted or upside down mounted on template and concrete wall, but can not be installed on plasterboard.

1.4.1 Steps of Wall Mount

Figure1-2 Steps of Wall Mount

1.4.2 Steps of Ceiling Mount

Figure1-3 Steps of Ceiling Mount

2. Product Overview

2.1 Product Overview

2.1.1 Dimension

Figure1-4 Product Dimension

2.2 Product Feature

Information communication HD camera series have perfect function, excellent performance, rich interface; advanced ISP processing technology and algorithm, making the image effect vivid and realistic, uniform picture brightness, strong sense of light and color levels, high definition, and good color reproduction. Support H.265/H.264 encoding, which makes the picture more smooth and clear under low bandwidth.

- **4K UHD Resolution:** 8.51M megapixel high quality SONY CMOS sensor. Resolution is up to 4K (3840×2160) with frame rate up to 30fps.
- **Optical Zoom Lens:** 12X optical zoom lens and 70° wide angle lens.
- **Leading Auto Focus Technology:** Fast, accurate and stable auto focusing technology.
- **Low Noise and High SNR:** Super high SNR image is achieved with low noise CMOS. Advanced 2D/3D noise reduction technology further reduces the noise while ensuring high image clarity.
- **Multiple Video Output Interfaces:** Support HDMI, SDI, USB3.0, wired LAN interface; support POE power, USB3.0 support dual stream.
- **Multiple Audio/Video Compression Standards:** Support YUY2, MJPEG, H.264, H.265, NV12 video encoding formats, MJPEG, H.264, H.265 support up to 3840×2160 resolution 30 frames per second compression; support AAC, MP3, G.711A audio compression.
- **Audio Input Interface:** Support AAC, MP3, G.711A audio coding, AAC, MP3 coding support 16000, 32000, 44100, 48000 sampling frequency.
- **Built In Gravity Sensor:** Built in gravity sensor, support PTZ auto flip, convenient for engineers to set up.
- **Multiple Network Protocol:** Support ONVIF, GB/T28181, RTSP, RTMP, VISCA Over IP, IP VISCA, RTMPS, SRT protocols; Support RTMP push mode, easy to be connected to streaming server (Wowza, FMS); Support RTP multicast mode; Support network full command VISCA control protocol.
- **Control Interface:** RS422 input(compatible with RS485), RS232 input/output, RS232 (cascade connection)
- **Multiple Control Protocol:** Support VISCA, PELCO-D, PELCO-P protocols; Support automatic identification protocols.
- **Quiet Pan / Tilt Movement:** With high accuracy step driving motor, camera can pan / tilt extremely quiet and smooth.
- **Multiple presets:** Up to 255 presets (10 presets via remote control).
- **Multiple Application:** Online-education, Lecture Capture, Webcasting, Video conferencing, Tele-medicine, Unified Communication, Emergency command and control systems, etc.

2.3 Technical Specification

Table1-1 Camera Lens Parameter

Parameter/Model	12X
Camera Lens	
Image Sensor	1/2.8 inch high quality HD CMOS sensor
Effective Pixel	16:9, 8.51 megapixel
Video Signal	HDMI : 4KP30, 4KP25, 1080P60、 1080P50、 1080P30、 1080P25、 720P60、 720P50、 1080P59.94、 1080P29.97、 720P59.94 SDI: 1080P30, 1080P25, 1080P29.97 ; USB3.0: Main Stream : YUY2/NV12: 1920×1080/1280×720/1024×576/800×600/800×448/640×360/480×270/320×180@10/5fps; MJPEG/H264: 3840*2160/1920×1080/1600×896/1280×720/1024×576/960×540/800×600/800×448/720×576/720×480/640×360/640×480/480×270/352×288/320×240@30/25/20/15/10/5fps; Sub-stream : YUY2/NV12: 1280×720/1024×576/800×600/800×448/640×360/640×480/480×270/320×180@30/25/20/15/10/5fps; MJPEG/H264: 1920×1080/1600×896/1280×720/1024×576/960×540/800×600/800×448/720×576/720×480/640×360/640×480/480×270/352×288/320×240@30/25/20/15/10/5fps;
Optical Zoom	12X
Viewing Angle	H : 6.5° (N) ~ 70.9° (W)
Iris	F1.6 ~ F2.8±5%
Digital Zoom	15X

Minimum Illumination	0.5Lux(F1.8, AGC ON)
DNR	2D & 3D
White Balance	Auto/Manual/One-push/Specified Color Temperature
Focus	Auto/Manual/One-push
Exposure Mode	Auto, Manual, Shutter Priority, Iris Priority, Brightness Priority
Iris Mode	F1.8 ~ F11, CLOSE
Shutter Speed	1/25 ~ 1/20000
BLC	On/off
Dynamic Range	Off, 1 ~ 8
Video Adjustment	Brightness, Chromaticity, Saturation, Contrast, Sharpness, Black And White Mode, Gamma Curve
SNR	>50dB

Table1-2 Interface Parameter

Interface Parameter	
Interfaces	HDMI, SDI, LAN(POE), USB3.0, A-IN, RS232-IN, RS232-OUT, RS422(Compatible with RS485), DC12V Power Supply, Dial Switch, Power Switch
Video Output	HDMI、SDI、LAN、USB3.0
Video Compression Format	LAN : H.264, H.265 USB 3.0 : MJPG, H264, YUY2, NV12
Audio Input Interface	Double track 3.5mm linear input;
Audio Output Interface	HDMI、SDI、LAN、USB3.0
Audio Compression Format	AAC, MP3, G.711A
LAN Interface	10M/100M/1000M adaptive Ethernet port, support POE power supply, support audio and video output.

Network Protocol	RTSP, RTMP, ONVIF, GB/T28181, VISCA OVER IP, IP VISCA, RTMPS, SRT, support remote upgrade, remote reboot, remote reset
Control Interface	RS232-IN, RS232-OUT, RS422 compatible with RS485
Serial Port Communication Protocols	VISCA/Pelco-D/Pelco-P ; Support Baudrate: 115200/38400/9600/4800/2400
USB Communication Protocol	UVC (Video Communication Protocol) , UAC (Audio Communication Protocol)
Power Supply	HEC3800 Power Socket(DC12V)
Power Adapter	Input: AC110V~AC220V ; Output: DC12V/2.5A
Input Voltage	DC12V±10%
Input Current	<1A
Consumption	<12W

Table1-3 PTZ Parameter

PTZ Parameter	
Pan Move	-170° ~ +170°
Tilt Move	-30° ~ +30° °
Pan Speed	0.1°/s ~ 60°/s
Tilt Speed	0.1°/s ~ 45°/s
Preset Speed	Pan : 60°/s, Tilt : 45°/s
Preset Quantity	Up to 255 preset (10 via remote control)

Table1-4 Other Parameter

Other Parameter	
Storage Temperature	-10℃ ~ +70℃
Storage Humidity	20% ~ 95%

Working Temperature	-10℃ ~ +50℃
Working Humidity	20% ~ 80%
Dimension	181 (L) mm×115mm (W) ×149mm (D)
Weight	1.2kg
Environment	Indoors

Table1-5 Accessory Parameter

Accessory	
Supplied Accessory	Power Adapter, RS232 Control Cable, USB3.0 Connection Cable, Remote Control, User Manual.
Optional Accessory	Mounting Bracket

Table1-6 AI Function Parameter

AI Function	
Real-time Tracking	The longest tracking distance of up to 6 to 7 meters, can support the speaker to walk at 3 to 4 mph
Zone Tracking	Support setting 4 tracking areas, and the areas is set within -170° ~ +170°in horizontal and -30° ~ +90°in vertical. Note: the zone tracking need to set via network control

2.4 Interface

2.4.1 Back Panel

Interface of this camera include: HDMI, USB3.0, SDI, Audio In, IP Jacket, RS232 In/Out, Dial Switch, RS485, DC12V Power Supply.

Figure1-5 Back Panel

2.4.2 RS-232 Jack

1) RS-232 Jack

Connection method of camera to PC or Controller.

Camera	WindowsDB-9

! Caution

- The product has RS232 input and output interfaces and can be cascaded in the above manner.

2.4.3 Rotary Dial

Figure1-8 Rotary dial corresponding to video format

Dial	Video Format	Dial	Video Format
0	4KP30	8	----
1	4KP25	9	----
2	1080P30	A	----
3	1080 P25	B	----
4	1080P29	C	----
5	----	D	----
6	----	E	----
7	----	F	----

Caution

- After switching the mode and dialing the code, you need to restart the camera to take effect;
 - When the rotary dial is 5-F, the video format item will be displayed in the menu;
-

3. How To Use

3.1 Output Image

3.1.1 Power-on Self-test

After powering on, camera will have initial configuration and receiver light will be flashing. Camera will do a brief pan-tilt tour and return to the home position, or if preset 0 is set, the camera will return to the preset 0 position).

3.1.2 Video Output

1) Network output: connect this product and your computer through network cable, then open the browser, enter the camera IP address (factory default 192.168.5.163) in the address bar, then to the login page and input a user name and password (factory default are "admin") ,Finally enter the preview page, and the image comes out.

(Note: If you forget your user name, password, IP address, you can manually restore the default by the remote controller key combination * #)

2) HDMI: Connect the monitor with the corresponding video output interface.

3) USB3.0 Output: Connect this product with computer USB2.0 interface, open the Device Manager to see whether there is an image device and whether the Universal Serial Bus controllers recognize USB3.0 device. After properly identified, open the software, choose the image device and then it will output image.

4) USB3.0 Compatible with USB3.0/ USB2.0 Output: Connect this product with computer USB2.0 interface, open the Device Manager to see whether there is an image device and whether the Universal Serial Bus controllers recognize USB3.0/USB2.0 device. After properly identified, open the software, choose the image device and then it will output image.

3.2 Remote Control

Remote control using instruction: There are wireless remote control and IR remote control for options.

Steps for wireless remote control usage are as below:

1) Code Pairing

Press the "Settings" + "*" button for 3 seconds, the LED will turn off to flashing, after releasing the button, the LED light will keep flashing to start the code pairing, the receiver is powered on, and the LED will be off when the code pairing is successful; If

you use other remote control, you need to clear the code of this remote control, or re-pair the code of the new remote control. If the code pairing has been unsuccessful, the red LED light flashes for 20 seconds and then goes out, stop the code pairing and go to sleep; at this time, press any key to wake up and re-pair the code.

Note: After the code is successfully matched, you need to select the camera address to control it

2) Clear Code Data

Press the "Settings" key + "#" key from light off to flashing, the receiving end is powered off and then powered on. The LED is off, indicating that the paired data is cleared successfully

3) Enter Sleep Mode and Wake Up

If there is no operation in the working state, it will immediately enter the sleep mode, and press any key to wake up.

3.2.1 IR Remote Control

1. Standby Key

After 3S long press, the camera will step into standby mode. Long press 3S again, the camera will self-test again and back to HOME position. (Note: If power-on mode is turned on and Preset 0 is set, and there is no operation within 12s, it will automatically point to the specified preset position.

2. Camera Address Selection

Select the camera address which wants to be controlled

3. Number Key

Set or run 0-9 presets

4,*,# Key

Key combination use

5. Focus Control Key

Auto Focus: Enter into auto focus mode.

Manual Focus: The camera focus mode is manual

Switch the camera focus mode to manual focus by pressing [focus +] or [focus -] to adjust.

6. Zoom Control Key

Zoom + :Lens near

Zoom - :Lens far

7. Set or Clear Preset key:

Set Preset: Set preset key + 0-9 number key:

Clear Preset key: Clear preset key + 0-9 number key

8. Pan/Tilt Control Key

Press ▲Key :Up

Press ▼Key :Down

Press ◀Key :Left

Press ▶Key: Right

“HOME” Key: Return to the middle position or enter into the next level menu

9. BLC Control Key

Back Light ON / OFF: Turn on or off the back light

10. Menu Setting

Open or close the OSD menu

Enter / exit the OSD menu or return to the previous menu.

11. Camera IR Remote Control Address Setting

13. AI Function Short Keys

【F1】: Turn off AI Human Detection

【F2】: Turn on AI Human Detection

【F3】: Toggle between real time tracking mode and region tracking mode

【F4】: Chang tracking target on real tracking mode

3.2.2 Remote Control Usage

Finishing initialization, it can receive and execute the IR commands. Press the remote controller button, the indicator light is flashing; release the button, the indicator light stops flashing. Users can control the pan/tilt/zoom, setting and running preset positions via the IR remote controller.

Key Instruction:

1. In this instruction, “press the key” means a click rather than a long-press, and a special note will be given if a long-press for more than one second is required.
2. When a key-combination is required, do it in sequence. For example,“ 【*】+【#】+【F1】 ”means press“ 【*】 ”first and then press“ 【#】 ” and last press“ 【F1】 ”

1) Camera Selection

Select the camera address to control.

2) Pan/Tilt Control

Up: press ▲ Down: press ▼

Left: press ◀ Right: press ▶

Back to middle position: press “【HOME】”

Press and hold the up/down/left/right key, the pan/tilt will keep running, from slow to fast, until it runs to the endpoint; the pan/tilt running stops as soon as the key is released.

3) Zoom Control

ZOOM IN: press “ZOOM ▲” key

ZOOM OUT: press “ZOOM ▼” key

Press and hold the key, the camera will keep zooming in or zooming out and stops as soon as the key is released.

4) Focus Control

Focus (near): Press “【focus+】” key (Valid only in manual focus mode)

Focus (far): Press “【focus-】”key (Valid only in manual focus mode)

Auto Focus: Support

Manual Focus: Support

Press and hold the key, the action of focus will keep continue and stops as soon as the key is released.

5) BLC Setting

BLC ON / OFF: support

6)Presets Setting, Running, Clearing

1.Preset setting: to set a preset position, the users should press the “【SET PRESET】” key first and then press the number key 0-9 to set a relative preset,

Note: 10 preset positions in total are available by remote controller.

2.Preset Running: Press a number key 0-9 directly to run a relative preset.

Note: Action in vain if a relative preset position is not existed.

3. Preset clearing : to clear a preset position, the user can press the “【CLEAR PRESET】” key first and then press the number key 0-9 to clear the relative preset;

Note : press the“【#】” key three times continually to cancel all the presets.

7) Camera Remote Controller Address Setting

【*】+【#】+【F1】:Camera Address No.1

【*】+【#】+【F2】:Camera Address No. 2

【*】+【#】+【F3】:Camera Address No. 3

【*】+【#】+【F4】:Camera Address No. 4

3.3 Menu Setting

3.3.1 Main Menu

In normal working mode, press 【MENU】 key to display the menu, using scroll arrow to point at or highlight the selected items.

Language : Chinese/English

Monocular Tracking: Enter into submenu of monocular tracking

Setting : Enter into submenu of system setting

Camera Parameter : Enter into submenu of camera parameter

P/T/Z : Enter into submenu of PTZ parameter

Version: Enter into submenu of version

Restore Factory Default: Select Yes or No to restore factory default.

[↑↓]Select : Press [↑↓] to Select menu

[← →]Revise : Press [← →] to revise parameter

[Menu]Return : Press [Menu] to return

[Home]Confirm : Press [Home] to confirm

3.3.2 Monocular Tracking

Monocular Tracking: On/Off

3.3.3 Setting System

Move the cursor to (Settings) and press the [HOME] key to enter the settings page, as shown below.

EV Level: -7~7 (only available in auto mode when EV is ON)

BLC: ON/OFF for options (only available in auto mode)

Flicker: OFF/50Hz/60Hz for options (only available in Auto/AAE/Bright **priority** modes)

Gain Limit: 0~15(only available in Auto/ Iris **priority** /Brightness **priority** mode)

DRC: Close,1~8

Shutter :1/25,1/30,1/50,1/60,1/90,1/100,1/120,1/180,1/250,1/350,1/500,1/1000,1/2000,1/3000,1/4000,1/6000,1/10000(only available in Manual and SAE mode)

IRIS :Close,F11.0,F9.6,F8.0,F6.8,F5.6,F4.8,F4.0,F3.4,F2.8,F2.4,F2.0,F1.8(only available in Manual and AAE mode)

Brightness: 0~20 (only available in Bright mode)

Gain: 0~15 (only available in Manual, SAE mode)

2) Color

Move the pointer to the (COLOR) in the Main Menu, click the **【HOME】** and enter the (COLOR SET) as follow

COLOR

=====

WB Mode	Auto
RG Tuning	-10
BG Tuning	-10
Saturation	100%
Hue	7
AWB Sensitivity	High

[↑↓]Select[← →]Change Value

[Menu]Back

WBMode: Auto, Manual, One Push, VAR

RG Tuning: -10~10(only available in Auto mode)

BG Tuning: -10~10(only available in Auto mode)

Red Gain: 0~100(only available in Manual mode)

Blue Gain: 0~100(only available in Manual mode)

Saturation: 0~127

Hue: 0~8

AWB Sensitivity: high/middle/low(only available in Auto mode)

Color Temp: 2400K-7100K (only available in VAR mode)

3) IMAGE

Move the pointer to the (IMAGE) in the Menu, click the【HOME】and enter the (IMAGE) as follow

Brightness: 0~100

Contrast: 0~100

Sharpness: 0~15

B&W Mode: color, black/white

Gamma: default, 0.45, 0.50, 0.55,0.63

DZoom: digital zoom options: On/Off

Low Light Mode: On/Off

4) Focus

Move the pointer to the (FOCUS) in the Menu, click the 【HOME】 and enter the (FOCUS) as follow.

Focus Mode: Auto, manual, OnePush

AF-Zone: All, Top, Center, Bottom

AF-Sensitivity: High, middle, low

5) Noise Reduction

Move the pointer to the (NOISE REDUCTION) in the Menu, click the **【HOME】** and enter the (NOISE REDUCTION) as follow.

NOISE REDUCTION

=====

NR-2D	3
NR-3D	3

[↑↓]Select [← →]Change Value

[Menu]Back

2D Noise Reduction: Auto, close, 1~8

3D Noise Reduction: Close, 1~8

3.3.5 P/T/Z

Move the pointer to the (P/T/Z) in the Main Menu, click the **【HOME】** and enter the (P/T/Z) as follow

P/T/Z

=====

Speed by zoom	ON
Zoom speed	8
Image Freezing	OFF
Acc Curve	Slow
Preset speed	10

[↑↓]Select [← →]Change Value

[Menu]Back

Depth of Field: Only effective for remote controller, On/ Off;

When zoom in, the Pan/Tilt control speed by remoter will become slow

Zoom Speed: Set the zoom speed for remote controller,1~8

Image Freezing: On/Off

Accelerating Curve: Fast/slow

Preset Speed: 1-10

3.3.6 Video Format

Move the pointer to the (Video Format) in the Menu, click the **【HOME】** and enter the (Video Format) as follow

Caution

- Exit menu after modifying parameter to save it
-

3.3.7 Version

Move the pointer to the (VERSION) in the Main Menu, click the **【HOME】** and enter the (VERSION) as follow

MCU Version: Display MCU version information

Camera Version: Display camera version information

AF Version: Display the focus version information

3.3.8 Restore Default

Move the pointer to the (VERSION) in the Main Menu, click the **【HOME】** and enter the (VERSION) as follow.

RESTORE DEFAULT

=====

Restore Default? NO

[↑↓]Select [← →]Change Value
[Menu]Back [Home]OK

Restore default: Yes/no ;(after restoring default, the language, color, and video format won't be restored)

Caution

- If the address of former remoter is not 1 but another one from 2,3,4, the corresponding camera address will restore to 1 when all parameters or system parameters are restored. User should change the remoter address to be 1 (press No.1 according to the camera so to get normal operation)
-

4. Network Connection

4.1 Connection Method

Direct Connection : Direct connections via “cross-over” network cable

Connection to LAN : Connections to LAN via patch cable to LAN wall jack or LAN switch

Caution

- Please do not put the power and network cable in places where can be easily touched to prevent video quality lowered by unstable signal transmission due to poor contact of cables.

The computer must have the network segment where the camera IP address belongs to. The device will not be accessible if without the segment. I.E. The camera default IP address is 192.168.5.163, then segment 5 must be added in the computer. Specific steps are as below:

Firstly open the window of Local Area Connection Properties on computer, select the “Internet protocol version 4(TCP/IPv4)” as shown by picture on the left. Double click or click the property “Internet” protocol version 4 (TCP/IPv4)to enter into the Internet Protocol Version 4(TCP/IPv4) Properties window, select “Advanced” to enter into the Advanced TCP/IP Setting and add IP and subnet mask in the IP browser as picture shown below. Click the “Confirm” to finish the adding of IP segment. User can add the corresponding network segment according to the revised IP address of the camera.

Caution

- The IP address to be added cannot be same with that of other computers or devices. The existence of this IP address needs to be verified before adding.

Click the “Start” and select “Operation” to input cmd as picture below to verify if the network segment has been successfully added.

```
Administrator: cmd.exe - Shortcut
C:\Windows\system32>ping 172.16.43.72

Pinging 172.16.43.72 with 32 bytes of data:

4.2 Camera Web Interface

4.2.1 Web Login

1) Web Login

After assigning an IP address to the camera, you can reach the Web Interface by typing in the camera's IP address into a web browser. You can log in this interface as administrator or user. If as administrator, type in "admin" into the username and password fields. If as user, type in "user1" or "user2" into the username and password fields. From the Web Interface, you can control the camera using the arrows on the left side. You can also adjust many of your camera's settings via this IP interface.

Note:

1. If login as "user", your rights are limited to preview, playback, and logout (No configuration right)
2. Browsers that support Web function are Google, IE, 360 and other popular browsers.

Language Selection: On the right top of the interface display "中文|English", click "English".

2) Download Plug-in

When first using IE browser to access the web conferencing camera, the login page will appear "Playback plug-in is not installed, please download and install!" Click on this message, download and install MRWebXinstall.exe, according to information prompts.

After installing the plugin, enter user name and password, click and Sign (initial default user name and password: "admin", users can change the user name and password on their own after entering) into the Web client management interface.

4.2.2 Preview

After successful login into the management interface, it enters the video preview interface. In the preview screen, users can control PTZ, zoom, focus, video capture, sound, focus, full screen and set the preset position, run, delete and other operations. You can record the video and save it on SD Card when SD Card built in. Video can be saved on the Computer at Local.

1) Login as administrator

User name and default password: admin

You can control PTZ, zoom, focus, video capture, sound, focus, full screen and set run, and delete the preset position.

2) Login as user

User name and default password: “user1” or “user2”

You can control PTZ, zoom, focus, video capture, sound, focus, full screen and set run, and delete the preset position.

4.2.3 Configuration

Click Configuration to enter into the device parameters setting page

There are the following options: Local configuration, audio configuration, video configuration, network configuration, internet access configuration, system configuration, detailed description see the following table.

Table1-7 Explanation of Camera Configuration

Menu	Explanation
Audio Configuration	Including audio compressing format, sampling frequency, sampling precision, compressing code rate settings etc.
Video Configuration	Including video encoding, video parameters, character-overlapping, character size, video output setting etc.
Network Configuration	Including basic parameters, Ethernet, DNS, wireless network setting, GB28181 etc.
System Configuration	Including equipment property, system time, user management, version update, Reset, Reboot device settings etc.

4.2.4 Audio Configuration

Switch: Choose to enable the audio or not.

Compressing Format: Set audio compressing format and manually reboot the device after change (default MP3, G.711A, AAC optional)

Sampling Frequency: Set sampling frequency and manually reboot the device after change (MP3, AAC default 16000, 32000, 44100, 48000 optional, G.711A default value is 48000)

Sampling Precision: Set sampling precision (default 16bits)

Compressing Code Rate: Set audio compressing code rate (default 64bits, 32, 48, 96, 128bits optional)

Channel Type: Set the channel type (mono by default, stereo optional)

Input volume: set the input volume (default 4, 1-10 optional)

Note Click “SAVE”, it will display “Successfully saved. Restart the device to take effect”.

4.2.5 Video Configuration

1) Video Encoding

Code Stream: Different video output mode setting, use different streams. (Main stream, secondary stream)

Compression Format: Set the video compression format, save to take it effect (primary / secondary stream default:H.264,H.265 optional)

Profile: Profile Mode Setting (Default HP, BP,MP Optional)

Video Size: Set video image resolution, save to take it effect (main stream default 1920 * 1080 or 1280 * 720 optional; default secondary stream 640 * 320, 320 * 180, 1280 * 720, 1920 * 1080 optional)

Stream Rate Control: Set rate control mode, save to take it effect (Primary / secondary stream default variable bit rate, fixed rate is for option).

Image Quality: Set the image quality, image quality can be changed only when rate control is variable bit rate,(main stream defaulted is better, secondary stream default is not good, there are best, better, good, bad, worse, worst for options).

Rate (Kb / s): Set the video bit rate (main stream default 4096Kb / s, 64-12288Kb / s optional; secondary stream default 1024Kb / s, 64-10240Kb / s optional).

Frame rate (F / S): Set the video frame rate (primary / secondary stream default 25F / S, primary stream 5-60F/S optional, secondary stream 5-30F / S optional).

Key frame interval: Set the key frame interval (primary / secondary stream default 75F, primary / stream 1-300F optional. secondary stream 1-150F optional).

Minimum QP of key frame interval: Set minimum QP of key frame interval(Default 20, 10-51 optional)

Stream Name: When streaming via rtsp or rtmp, user can modify stream name. Main Stream(live/av0), sub stream(live/av1)

Click the "Save" button to display the "Parameter saved successfully" message, then settings take effect.

2) Stream Release

Switch: To turn on/off the main / secondary stream.

Protocol: primary / secondary stream applies RTMP protocol.

Host Port: server port number (default 1935, 0-65535 optional)

Host Address: server IP addresses (default 192.168.5.11)

Stream Name: choose a different stream name (live / av0,live / av1 optional).

User: Set the user name.

Password: Set the password.

Click on the "Save" button to display the "Save successful" message, then settings take effect.

3) RTP Broadcasting

Main/Sub Stream : On/off ;

Protocol : RTP or TS

Address : Default 224.1.2.3. It can be edited.

Port : The main stream defaults to 4000, the secondary stream defaults to 4002, and the main/secondary stream is optional from 0 to 65535.

Visit : Address comes up after setting. Eg; rtp://224.1.2.3:4000 ;
udp://@224.1.2.3:4000 ; tcp://@224.1.2.3:4002 ;

4) Video Parameters

A) Focus: Focus mode, focus tactic, focus sensitivity can be set.

Focus Mode: set the focus mode (Default automatic, manual optional, one-push)

Focus Tactic: set the focus tactic (Default before-focus, after-focus, normal meeting, education tracking, moving-target focus, center focus optional.)

Focus Sensitivity: Set the focus sensitivity (default is low, high, medium optional)

B) Exposure: Exposure mode, exposure compensation, backlight compensation, anti-flicker, gain limit, dynamic range, shutter, aperture, brightness, gain can be set.

Exposure Mode: Set the exposure mode (Default automatic, manual, shutter priority, aperture priority, brightness priority optional)

Exposure Compensation: Exposure compensation setting is active when it is auto status (default is off).

Exposure Compensation Value: Set the exposure compensation value, valid when Exposure Compensation is on (default 0,-7 to 7 optional).

BLC: Set back light compensation, valid when it is auto status (default is off).

Gain Limit: Set the gain limits, valid in auto focus, iris priority, and brightness priority.

Gain: Set gain, only valid in manual exposure mode and shutter priority (default 0, 0~20 optional)

Dynamic Range: Set the dynamic range (default 4, 1-8 optional).

Shutter Speed: Set shutter speed value, valid in manual focus and shutter priority. (default 1/100, 1/25, 1/30, 1/50, 1/60, 1/90, 1/100, 1/120, 1/180, 1/250, 1/350, 1/500, 1/1000, 1/2000, 1/3000, 1/4000, 1/6000, 1/10000 optional).

Aperture Value: Set the aperture value, valid in auto focus and iris priority (default F1.8, closed, F11, F9.6, F8.0, F6.8, F5.6, F4.8, F4.0, F3.4, F2.8, F2.4, F2.0, F1.8 optional).

Brightness: Set the brightness value, valid in brightness priority mode (default 7, 0-23 optional).

C) Color: White balance, saturation, hue, white balance sensitivity, red fine tuning, blue fine tuning, red gain, blue gain can be set.

White Balance Mode: Set the white balance mode (Default automatic, manual, one-push white balance, 3000K, 3500K, 4000K, 4500K, 5000K, 5500K, 6000K, 6500K, 7000K optional). Note: Right click the "Correction" button when selected the One-push white balance mode.

Saturation: Set the saturation (default 100%, 60%, 70%, 80%, 90%, 100%, 110%, 120%, 130%, 140%, 150%, 160%, 170%, 180%, 190%, 200% optional).

Red Fine Tuning: Set red fine tuning, valid in manual white balance mode.

Blue Fine Tuning: Set Blue fine tuning, valid in manual white balance mode.

Chroma: Set the chrome (default 7, 0-14 optional).

Auto White Balance Sensitivity: Sensitivity Auto white balance settings (default is low, high, medium optional).

Red Gain: Set the red gain, effective when it is manual (default 145, 0-255 optional).

Blue Gain: Sets the Blue gain, effective when it is manual (default 56, 0-255 optional).

D) Image: You can set brightness, contrast, sharpness, gamma curve, dynamic contrast, black and white mode, horizontal flip, vertical flip, electronic zoom, ultra-low illumination

Brightness: Set the brightness (default 7, 0-14 optional).

Contrast: Set the contrast (default 7, 0-14 optional).

Sharpness: Set the sharpness value (default 6, 0-15 optional).

Gamma: Gamma value setting (default 0.45, 0.50, 0.55, 0.63 optional).

Dynamic Contrast: Set dynamic contrast (default off, 1-8 optional)

BW Mode: Set black and white mode (default color, black/white optional).

Flip Horizontal: Set Flip Horizontal (default off, on optional).

Flip Vertical: Set vertical flip (default off, on optional).

Digital Zoom: Set digital zoom (default off, on optional)

Auto Flip: Set image auto flip (default off, on optional)

Lens Distortion Calibration: Set image distortion (default off, on optional)

E) Noise Reduction: 2D noise reduction, 3D noise reduction and dynamic dead pixel correction available.

2D Noise Reduction: Set 2D noise reduction level (default 3, 1-8 and off optional).

3D Noise Reduction: Set 3D noise reduction level (default 3, 1-8 and off optional).

Dynamic dead pixel correction: Set Dynamic dead pixel correction (default 4, 1-5 optional).

F) Style: Select image (Default, standard, brightness, clarity, and soft can be set)

Caution

- Refresh the page after changing above parameters in a, b, c, d, e, f to take effect.
-

5) Character Overlapping

Display Time & Date: Yes/No

Display Title: Yes/No

Time, Font and Color: Default white, black, yellow, red and blue optional)

Title Font Color: Default white, black, yellow, red, and blue optional)

Move Character: Set the location where the time and title to display. Click “ up, down, left, right” button to move the characters’ location.

Title: Set title on device property (default CAMERA1)

Time: Set time on system time (default 1970/01/01 05:36:00)

Click “Save” button, “parameters are successfully saves” window pop-up, which means the setting take effect.

6) Character Size

Automatically Adjust According to the Resolution: Yes/No

Main Stream Character Size: Set the character size of the display, the device will automatically restart after changed (default 48, 28-200 optional)

Secondary Stream Character Size: Set the character size of the display, the device will automatically restart after changed (default 48, 28-200 optional)

Click “Save” button, “parameters are successfully saves” window pop-up, which means the setting take effect.

7) Video Output

Output Format: Set the video output format (default 1080P60, 1080P50, 1080P30, 1080P25, 1080I60, 1080I50, 720P60, 720P50, 1080P59.94, 1080I59.94, 1080P29.97, 720P59.94 optional).

Click "Save" button, "parameters are successfully saves" window pop-up, which means the setting take effect.

4.2.6 Network Configuration

1) Network Port

Data Port: set the data port, the device will restart automatically after changed (default 3000, 0-65535 optional).

Web Port: Set Web port, the device will restart automatically after changed (default is 80, 0-65535 is optional).

Onvif Port: Set Onvif port, the device will restart automatically after changed (default 2000, 0-65535 optional).

Soap Port: Set Soap port (default 1936, 0-65535 optional).

RTMP Port: Set RTMP port (default 1935, 0-65535 optional).

RTSP Port: Set RTSP port, the device will restart automatically after changed (default 554, 0-65535 optional).

Visca Port: Set Visca port, the device will restart automatically after changed (default 3001, 0-65535 optional).

Https Port: Set http port, the device will restart automatically after changed (default 443, 0-65535 optional).

WebSocket Port : Set WebSocket port, the device will restart automatically after changed (default 8088, 0-65535 optional).

Click on the "Save" button, it will be valid when display "Save successful".

RTSP access: rtsp: // equipment IP address: 554 / live/av0 (av0 main stream; av1 second stream)

RTMP Access : Rtmp://equipment IP address: 1935 / live/av0 (av0 main stream; av1 second stream)

2) Ethernet Parameter

DHCP: Enable or disable obtain IP automatically can be set. After saved, reboot the device to takes effect (default: OFF)

IP Address: Set the IP address, after saved, reboot the device to takes effect (default 192.168.5.163).

Note: This IP address is the same with the one used to login Web page.

Subnet Mask: Set the subnet mask (default 255.255.255.0).

Default Gateway: Set the default gateway (default 0.0.0.0).

Physical Address: Set the physical address (the parameter is read-only)

Click the "Save" button, it will be valid when display "Save successful". (Note: To prevent IP conflicts when modify).

3) DNS parameters

Preferred DNS Server: Set the preferred DNS server. (Default 0.0.0.0).

Alternate DNS Server: Set alternate DNS server. (Default 0.0.0.0).

Click the "Save" button, it will be valid when display "Save successful".

4) GB28181

Switch: Set whether to activate GB28181.

Time Synchronization: Enable/Disable time synchronization

Stream Type: Set stream type (default main stream, secondary stream optional)

Signing Time (in seconds): 3600, range 5-65535

Heartbeat Time (seconds): 60, range 1-65535

Register ID: 34020000001320000001

Register User Name: IPC

Register Password: 12345678

Equipment Ownership: Users can add their own

Administrative Regions: Users can add their own

Alarm Zone: Users can add their own

Equipment Installation Address: Users can add their own

Local SIP Port: 5060 Range 0-65535

GB28181 Server Address: IP address of the computer

Server SIP Port: 5060 Range 0-65535

Server ID: 34020000002000000001

Click on the "Save" button, it will be valid when display "Save successful".

5) SRT

SRT Port: Set the SRT port (default 9000, 0-65535 optional)

SRT Password: Set SRT password

SRT Password Length: Set the SRT password length (default 0, 16, 24, 32 optional)

Click the "Save" button, and the prompt message "Parameters saved successfully! It will take effect after restarting!"

6) RTMP

Enable RTMP: Enable/Disable RTMP

Click the "Save" button, and it will display "Parameters saved successfully! The new parameter will take effect after restarting.

7) RTSP

Enable RTSP: Enable/Disable RTSP

RTSP Authentication: Set RTSP authentication, default off, on optional

Click the "Save" button, and the prompt message "Save successfully! Modify RTSP authentication parameters will take effect after restarting the device!" will be displayed. After setting, restart the camera to take effect.

4.2.7 System Configuration

1) Device Properties

Device Name: Set the device name (Default Camera-1, user can add their own).

Device ID: Set the device ID (default 1, read-only).

System Language: Set the system language (default Simplified Chinese, English optional). Need to re-login after modify and save the setting.

Click on the "Save" button, it will be valid when display "Save successful".

2) System Time

Date Format: Set the date format (YYYY-MM-DD default year - month - day, MM-DD-YYYY namely Month - Day - Year, DD-MM-YYYY date - month - year Optional).

Date Separator: set the date separator (default '/', '.', '-' Optional).

Time Zone: Set the time zone (default UTC+08:00, other time zones optional).

Time Type: Set the time types (default 24 hours, optional 12 hours).

Enable NTP: Enable/disable NTP

Update Interval: Set the NTP server automatic updated time interval. Valid after setting NTP server synchronization (default one day, 2-10 days Optional).

NTP Server Address or Domain Name: Set NTP server address or domain name (default time.nits.gov). Valid after setting NTP server synchronization.

NTP Server Port: Sets the NTP server port (default 123). Valid after setting NTP server synchronization.

Click on the "Save" button, it will be valid when display "Save successful".

3) User Management

Select Users: Set the user type (the default administrator, User 1, User 2 optional)

User Name: Set the user name (Select User Administrator default admin; select a common user1 default user1; to select a common user 2 default user2; user can modify their own)

Password: Set a password (Select User Administrator default admin; select a common user1 default user1; to select a common user 2 default user2; user can modify their own).

Password Confirmation: Confirm the input passwords are the same or not.

4) Version Update

The version information displayed on the page is read-only version and cannot be modified by the user. It is the same as the version information in the menu. The version information of different device models is different.

Update File: Click "Browse..." in the pop-up window and select the upgrade file; click the "Upgrade" button, the upgrade dialog box will pop up. After successfully update, device will automatically reboot. (Note: Make sure that the device power and network can work during update, if not, the upgrade will fail.)

Caution

- After the version upgrade is completed, you need to restore the factory default values

- a, restore the factory default through web configuration;
- b, restore the factory default value through the menu;
- c, remote control shortcut key *#6 restore factory default;

Choose one of the above three methods, in which the IP account and password of "method a" are also restored to the default.

5) Restore Factory Setting

Click "Restore Factory Defaults" button and choose "yes" or "no" on pop-up window, then the device will restart automatically and restore factory setting.

6) Reboot

Click "Reboot" button and choose "yes" or "no" on the pop-up window, then the device will restart automatically.

4.2.8 Logout

Click "Logout"; and select "Yes" or "No" on pop-up window. If choose "Yes", you will exit the current page and return to the user login interface again.

4.2.9 Monocular AI Tracking Function Web Page Configuration

1. After login, enter into the management interface and turn on Tracking below “Monocular Tracking”
2. On the right top is PTZ control area, in which you can set the preset region of Regional Tracking. Interface is as below.

Regional Settings Steps (We take Region1 as an example):

1. On the PTZ Area, adjust image by clicking direction buttons to select one region.
2. After finishing region1 setting, click “Set” to complete the Region1 Tracking. Other region settings are same as region1 setting steps.

You can set 4 different regions, and minimum 2 regions. And the Regional Tracking settings can only be configured through the webpage.

Call out the regional tracking: Click “Run” of corresponding region on the “Regional settings” area.

1. Each preset preview image must be continuous from left to right and overlap when setting the tracking regions.
2. You need to tick next to the region number to save the setting location when you setting the region.

5. Serial Port Communication Port

In normal working state, you can control the camera through RS232/RS485 (VISCA IN) cable. The parameter of RS232 is as below:

Baud rate: 2400/4800/9600/115200/second

Start Bit : 1 bit ;

Data Bit : 8 bit ;

Stop Bit : 1 bit ;

Verification Bit : None.

After power on, the camera will have a brief tour and then back to the center position.

The zoom lens is pulled to the farthest position, and then pulled back, after that self-test is completed.

5.1 VISCA Protocol List

5.1.1 VISCA Protocol List

Ack/Completion Message		
	Command packet	Remark
ACK	z0 41 FF	Returned when the command is accepted.
Completion	z0 51 FF	Returned when the command has been executed.

z = device address + 8

Error Messages		
	Command packet	Remark
Syntax Error	z0 60 02 FF	Returned when the command format is different or when a command with illegal command parameters is accepted.
Command Buffer Full	z0 60 03 FF	Indicates that two sockets are already being used(executing two commands) and the command could not be accepted when

		received.
Command Canceled	z0 6y 04 FF(y: Socket No.)	Returned when a command which is being executed in a socket specified by the cancel command is canceled. The completion message for the command is not returned.
No Socket	z0 6y 05 FF(y: Socket No.)	Returned when no command is executed in a socket specified by the cancel command, or when an invalid socket number is specified.
Command Not Executable	z0 6y 41 FF(y: Execution command Socket No. Inquiry command: 0)	Returned when a command cannot be executed due to current conditions. For example, when commands controlling the focus manually are received during auto focus.

6. Maintenance and Troubleshooting

6.1 Camera Maintenance

- 1) If the camera will not be used for a long time, please turn off the power switch.
- 2) Use a soft cloth or lotion-free tissue to clean the camera body.
- 3) Use a soft dry lint-free cloth to clean the lens. If the camera is very dirty, clean it with a diluted neutral detergent. Do not use any type of solvent or harsh detergent, which may damage the surface.

6.2 Unqualified Applications

- Do not shoot extremely bright objects for a long period of time, such as sunlight, ultra-bright light sources, etc...
- Do not operate in unstable lighting conditions, otherwise the image may flicker.
- Do not operate close to powerful electromagnetic radiation, such as TV or radio transmitters, etc...

6.3 Troubleshooting

- No image
 1. Check whether the power cord is connected, voltage is OK, POWER lamp is lit.
 2. Check whether the camera can “self-test” after startup (camera will do a brief pan-tilt tour and return to the home position, or if preset 0 is set, the camera will return to the preset 0 position).
 3. Check that the cable is connected correctly.
 1. If HDMI, make sure that the destination device is accessing the HDMI port that you plugged into.
 2. If SDI, make sure that the destination device is accessing the SDI port that you plugged into.
- Abnormal display of image
 1. Check setting of rotary dial on rear of camera. Be sure to use a resolution and refresh rate that is supported by your software.
- Image is shaky or vibrating.

1. Check whether camera is mounted solidly or sitting on a steady horizontal and level surface.
2. Check the building and any supporting furniture for vibration. Ceiling mounts are often affected by building vibration more than wall mounts.
3. Any external vibration that is affecting the camera will be more apparent when in tele zoom (zoomed in)
