function will be different after connected the remote.

Bluetooth Remote Control Connections

1. **Power On**: Press and hold the power button until the indicator light comes on (about 2 seconds) and the system turns on.

Note: Please install the battery(Not Included) first.

2. **Power Off**: Press and hold the Power button until the indicator light turns off (about 5 seconds) and the system shuts down.

***Note:** The system will automatically shut down after 5 minutes when there is no wireless device connected on power on status. The system will also automatically shut down after 30 minutes without any operation even when there is a wireless device connected.*

3. iOS Connection

  1) First of all, open the Bluetooth

  2) Open the APP

  3) Turn on the remote control (pay attention to the open order), and the LED indicator will flash

  4) Then the system will automatically enter the wireless pairing mode

  5) Allow Bluetooth pairing

  6) APP will showing it has been automatically connected to FEELWORLD-XX successfully.

  Tips: The remote control cannot be connected to the iPhone?

  Firstly, please check whether the remote control is connected by Bluetooth in the Bluetooth settings of your phone.

  Secondly, following the below steps to reconnect:

  -- Disconnect Bluetooth, remote control power off

  -- Turn on the Bluetooth of the phone, and then open the app, the remote control turn on again and pairing again according to the remote control connection instructions.

4. Andriod Connect

After power on, LED light on, auto pairing mode, turn on the Bluetooth of the phone, then turn on APP, will show the Bluetooth connected automatically.

Unit size	260x320x240-300mm
Net weight	1.475kg

FAQ

The remote control can not be connected to the phone, how to solve?

-- Whether the phone positioning permission is disabled.

-- Whether the remote control has been connected to other phone.

-- Whether the remote control has launched a new Bluetooth signal (to check if other App can search the signal).

-- Restart the Bluetooth device and the app.

The remote control is connected to the phone, but can not control the file playback?

-- Close the extra background running programs on the phone.

-- Turn off the Bluetooth of other cell phones on site, make sure the remote control and the phone connected is the only pairing.

-- Make sure that each time the remote control is connected to the phone through the app rather than through the Bluetooth setting of the phone system. Otherwise the remote control will not work.
